

Sifat Bin Anwar

Full Stack Web Developer

Bangladesh · Remote Worldwide · sifatbin.official@gmail.com · github.com/sifatshams

SUMMARY

Full stack developer building scalable, modern and high-performance web applications with clean architecture and exceptional user experience. Four years of hands-on practice across the MERN stack and TypeScript, with a focus on accessibility, Core Web Vitals and maintainable systems.

EXPERIENCE

Freelance Full Stack Developer — Remote, Worldwide | 2025 — Present

- Design and ship production web applications for founders and small product teams.
- Own architecture decisions from database schema to deployment pipeline.
- Reduced average page load by 48% across three client projects.

Frontend Developer (Contract) — Startup Studio, Dhaka | 2024 — 2025

- Built a reusable component library adopted across four internal products.
- Introduced typed API clients, cutting integration bugs significantly.

SKILLS

React, Next.js, JavaScript (ES2024), TypeScript, Node.js, Express, MongoDB, Firebase, Tailwind CSS, Git & GitHub, REST APIs, JWT Authentication

CERTIFICATIONS

- Complete Web Development — Programming Hero (2024)
- JavaScript Algorithms & Data Structures — freeCodeCamp (2024)
